Our Brands

NANO-SAKURA is one of our product lines to reduce environmental load.

Our goal is **100% Biomass without any petroleum** and **Biodegradable**.

Change the Plastic, change the World and change the future.
We will never give up and will prevail with BIOMASS and BIODEGRABLE plastics.

Global Problems & Crisis

Environment problem by CO2 emission

Global Warming

Abnormal Climate

Marine pollution

Plastic derived from Petroleum and Environment problems are deeply linked.

The JPN government has set 46% CO2 reduction in 2030 to be compared with that in 2013 and

Declared to be zero of greenhouse gas emission by the time in 2050.

GS CNF PLA for Injection

Cellulose Nano Fiber + P L A compounds

Starch blended material

PLA × Starch × CNF

Corn Starch
Rice Starch
Tapioca Starch etc..

Injection
Mold

Rice starch blended
Cutlery

Sargassum based 100% Biomass and Biodegradable Resin

Sargassum, seaweed in Caribbean Ocean, increasing by Global Warming and Deforestation of Amazon.

Sargassum Biodegradable Plastic Business Trial has been performed with the help of UNOPOS (United Nations) support.

Import

Compound

Injection
Molding

Antigua and Barbuda

Sargassum

Sargassum Composite

Sargassum Cultery

Thank you for
your attention.

company Number

072-759-8501

Address

2-22-11, Ohana, Kawanishi
City, Hyogo Prefecture.
