Company Summary 企業概要		
<p>As a local alcohol wholesaler located in Nara Prefecture, we are actively developing alcohol, beverage, and food brands focused on Nara, taking the opposite strategy to trading companies that order products from all over the country or the world and supply them to channels.</p> <p>Nara is also said to be the birthplace of sake, and many high-quality sakes are sold there, but as a wholesaler that can take a step back from the producers' perspective and oversee producers, retailers, and consumers as a whole, we are developing brands with an awareness of market-in rather than product-out, and currently have over 50 brands of alcohol and beverage items on sale. We are also working on unifying branded products that bring together the brands of sake breweries in each region.</p> <p>Nara is famous for its agricultural products such as tea, plums, rice, strawberries, and persimmons. We also sell plum wine made with black tea produced in Nara Prefecture, sake made with rice produced in Nara Prefecture, and wine, liqueurs, and cider made with Nara's brand strawberries and persimmons. These products have been highly praised in the domestic market and are also exported to countries and regions such as the United States, Australia, China, Taiwan, and the United Kingdom.</p>
